

ALVARADO MST-TE Full Height Turnstile

Alvarado now offers North America's most specified and used maximum security full height turnstile in a motorized, 100% touchless version. After presenting a valid entry credential, an overhead sensor detects the user as they enter. Rotation begins and completes automatically, eliminating the need for users to push their way through the turnstile.

In free pass mode, users simply walk into the passage area. The overhead sensor detects the user's presence and starts the rotation cycle, allowing exit. The result is a smooth and secure, completely touchless entry and exit passage.

Common Applications

- Perimeter control and fence line security
- Time and attendance integration
- Employee and visitor access control
- Unmanned point of entry
- Single-direction control and/or one-way exiting
- Inside and outside locations

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.

Key Features

Touchless Operation:	Touchless exit and entry
Easy Integration:	Integrates with any access control system
Steel Construction:	Welded steel construction with no exposed bolts or fasteners
