

ALVARADO

MSG

Pedestrian Gates

Alvarado's full height pedestrian security gate looks and functions much better than a chain link gate or a one-off fabricated solution. MSG full height gates have a large 48" opening width and are often installed in conjunction with full height turnstiles to provide passageways for accessibility or material deliveries. The individual frame and gate are welded assemblies and the various models provide several lock and push bar options. The gates ship pre-framed and fully assembled.

Common Applications

- Warehouse and distribution facilities
- Petrol and chemical facilities
- Manufacturing facilities
- Employee and visitor access control
- Loss prevention
- Delivery access

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.
