

## HTG-M

### Mesh

#### Full Height ADA Gate

##### Applications:

The HTG-M full height gates with mesh infill provide the same floor-to-ceiling level of security coverage as our full height turnstiles — while simultaneously providing an ADA compliant clear opening for disabled entrants. These HTG-M full height gates are outfitted with mesh infill for advanced reach through protection; and can even come from the factory with an optional panic bar to be your perfect emergency exit solution.

The HTG-M works great as a standalone access control solution, but it really shines when paired with one of our SecureTurn series full height turnstiles — to provide a comprehensive access control solution. All Hayward Turnstiles Full Height ADA gates are designed for handicap access>

##### Features:

- Designed as an ADA compliant solution for perimeter security
- ADA compliant lane width
- Fully-welded exterior components
- Built from heavy-gauge materials that meet ASTM standards
- Gate automatically closes with included self-closing hinge
- Gate can be unlocked or unlocked manually using a key (included)

##### About Hayward Turnstiles:

Hayward Turnstiles has over 50 years of expertise in quality manufacturing of precision aircraft parts and reliable turnstiles. Our factory, in Milford, CT, is AS9100 Certified to aerospace standards resulting in superior turnstiles. Engineered to industrial grade specifications, they are durable and built tough for long lasting performance. Proudly made in the USA, we distribute worldwide with installations across the globe.

Get in touch with us for expert advice, design assistance, project review, free quotes and for help with your security needs.

## HTG-M Specifications

The SwingGate HTG-M is the perfect solution for anyone looking to harness the security of a full height entry product without sacrificing handicap accessibility. This model is also great if you have an entrance that is frequented with deliveries, entrants with toolboxes or luggage, or any other item that would not regularly fit through a full height turnstile. Its mesh infill makes it perfect for high security engagements or unmanned entrances.

### Secure Turn Full Height Models:

- SecureTurn HT431 Standard Passage 31"
- SecureTurn HT439 Wide Passage 39"
- SecureTurn HT448 Extra Wide Passage 48"
- SecureTurn HT431T Tandem Size for double passage

### Design & Construction:

- Designed as an ADA compliant solution for perimeter security
- ADA compliant passage width
- Fully welded exterior components
- Built from heavy gauge materials that meet ASTM standards
- Vertical steel bars coupled with steel mesh infill keep unauthorized entrants out and prevent reach through and tampering
- Minimally exposed, tamper proof hardware

### Product Finish:

- Hot Dip Galvanized Steel
- Powder Coated Steel (custom colors available)

### Electrical Specifications:

UL Approved Electronic Strike: Input Voltage: 24VDC  
Input Current: 170 mA

### Options:

- Push Operated Panic Bar for Free Exit Situations (Included)
- Kick plate (for compliance in certain states)
- 85dB Panic Bar Alarm
- Card Reader Mounting Plates
- Reach Prevention Infill Panels
- Push Buttons
- Additional Options Available Upon Request

### Gate Operation:

- Gate automatically closes with included self closing hinge
- Field reversible electronic strike lock (24VDC) included
- Strike lock can be used mechanically with a key or electronically when integrated with virtually any access control software via a momentary dry contact suspension

### Warranty:

Units are warranted against defects in materials and workmanship for one year.
