

ALVARADO **EDM Series** **Waist High Turnstile**

Alvarado waist high turnstiles are installed in thousands of locations worldwide. Used for bi-directional access control, crowd control, and patron counting, the EDM comes in square end and bullnose end cabinet styles in both standard and extended arm lengths.

The EDM is a motorized waist high turnstile that provides single or bi-directional access control. The motorized arm rotation provides a very comfortable passage experience for patrons. Upon loss of power or fire system input, the horizontal arm automatically drops to provide a clear exit passageway. Upon restoration of power or removal of the fire system input, the arms automatically engage to the normal operating position.

Common Applications

- Employee access control
- Visitor access control
- Crowd control
- People counting

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.
