

ALVARADO FMST Full Height Turnstile

Full height turnstiles from Alvarado secure sensitive and restricted areas and provide entry control for all kinds of applications. Turnstiles do what a gate or door cannot: provide directional control of each passage and limit access to one person per activation. A turnstile does not sleep, take breaks, play favorites or require a paycheck, it simply provides a secure, unmanned coin or entry to further increase facility security.

The FMST is a four arm, full height turnstile. Four arm turnstiles have a compact patron passage area, making it difficult to piggyback in access control applications.

Common Applications

- Perimeter control and fence line security
- Time and attendance integration
- Employee and visitor access control
- Unmanned point of entry
- Single-direction control / one-way exiting
- Inside and outside locations

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.

Key Features

| | |
|--|---|
| Full Featured Control Board (electric models): | Works with any access control or card reader without added relays, electronics or programming for an effortless integration. |
| Hydraulic Speed Control/Self-Centering: | Self-adjusting user pushing tension eliminates slamming and smoothly selfcenters the Roto, increasing user safety and extending equipment life. |
| Fully Welded Roto, Yoke & OV: | Welded construction (no bolts & fasteners) increases product strength, simplifies installation and produces a more attractive & secure turnstile. |
| Built-in Key Override Controls: | Quickly unlocks one or both directions for more flexible product use and easy authorized bypass access. |
| Pull Out Top Channel Cover: | Stainless Top Channel Cover may be removed horizontally, reducing the clear overhead space required for removal. |
| Four Arm Design | Compact passage which makes it difficult to piggyback in access control applications |

Available Models

- FMST-3 - (Manual)
- FMST-6X - (Electrically Controlled)

Options

Dozens of options and a selection of materials and finishes are available

Complementary Products

MSG pedestrian security gates often accompany full height turnstiles to facilitate delivery of material or bulky items.

Resources

The knowledgeable staff at Avant-Gardes realizes that many customers do not regularly deal with turnstiles. To ensure your facility receives the best solution, we offer expert assistance and technical expertise.
