

## ALVARADO VSG Pedestrian Gates

The VSG is a self-closing gate that is ideal for use in applications where waist high or optical turnstiles are installed. The gate is suitable for special needs access and also provides a convenient method of facilitating material delivery or large group passage.

The VSG is available in electric-locking and non-locking versions. Both versions are available with infill bars or a clear panel infill. VSG gates open in a single direction and have a heavy-duty hydraulic closure that closes the gate smoothly – without banging. Electric lock versions integrate with access control systems. Post outlets can be added to either the hinge or latch post to incorporate Alvarado post and railing.

### Common Applications

- Corporate facilities
- Sports parks, arenas, and stadiums
- Amusement parks
- Retail stores

### Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.
