

## ALVARADO ARGUS Optical Turnstile

The compact model has everything that an elegant sensor barrier needs. With a length of just 1,200 mm, it is also suitable for installation situations where space is limited.

Compared with the longer variants, the equipment is reduced yet offers the full functionality. Panels in the centre of the profile close the open body on request. If you are happy to do without a lighting strip on the hand rail and ambient lighting, you are not missing out on anything with this model.

The entire technology is holistically secure. A complete sensor barrier with puristic aesthetics

### Available in Three Models:

**Argus 40** (47.25") Compact for smaller areas

**Argus 60** (65") Higher security with additional vertical sensors

**Argus 80** (65 3/8") Same security as the Argus 60, but with a seamless inlay for a more refined look

### Common Applications

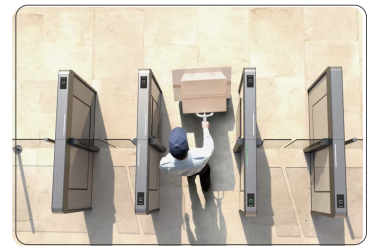

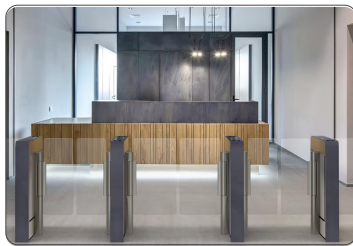

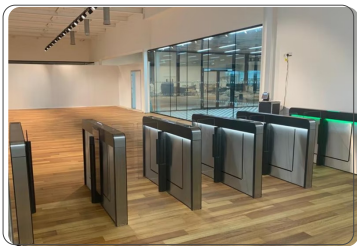

- Employee and visitor access control
- Pedestrian traffic flow control
- Time and attendance integration

### Why Alvarado?

Alvarado is America's leading entry control products manufacturer. Founded in 1956, Alvarado turnstiles and gates are installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.
