

 **ALVARADO**

W

Crowd Control Turnstile

Alvarado W is a three-arm turnstile that is an excellent choice for installations where space is at a premium. The W turnstile takes up less space than the 4-arm crowd control turnstiles; yet, still provides a comfortable width for patron passage. The turnstile rotates in one direction; in either the clockwise or counter-clockwise direction. The turnstile's three arm rotating section moves smoothly and silently and requires very minimal hand pressure to move. The W turnstile can also be ordered in left hand or right hand operation.

Common Applications

- Controlling Pedestrian Traffic Flow
- Employee & Visitor Access Control
- People Counting

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.

Key Features
