

ALVARADO MST47 Full Height Turnstile

The MST47 extended arm full height offers an extended and wider version of the MST. The longer 47" arms offer a wider passageway for patrons, and offers the same features that you have come to expect from the MST. The integral sections of the MST47 extended arm full height turnstile are fully welded, creating a solid, secure, and structurally sound installed product. Details matter, especially when manufacturing an extended arm full height turnstile that will see years of service.

Common Applications

- Perimeter control and fence line security
- Time and attendance integration
- Employee and visitor access control
- Unmanned point of entry
- Single-direction control and/or one-way exiting
- Inside and outside locations

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.
