

ALVARADO

SSG

Pedestrian Gates

The SSG is a highly versatile self-closing, non-locking pedestrian gate that can be field-configured to swing either bidirectionally or in a single direction (either entry or exit). The SSG is suitable for all types of pedestrian flow control applications. The gate opens easily with minimal force. A reliable, gravity-assisted closure brings the gate arm smoothly back to the closed position.

SSG gates provide 36" of passage width and can be installed stand-alone, or in conjunction with Alvarado's modular post and rail and/or turnstiles. Railing outlets can be added to the hinge post to accept Alvarado 1.75" railing. The addition of an optional latch and latch post allows the gate to be secured when closed.

Common Applications

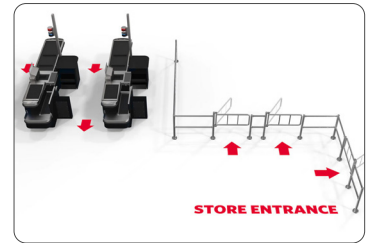

- Grocery and retail stores
- Warehouses
- Entertainment facilities
- Airports

Why Alvarado?

Alvarado is the leading manufacturer of waist high turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world. Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.

Key Features

Field Configuration:	The unique design of the CSG and SSG crowd control gates allows field configuration of the swing operation
Versatile Swing Sonfiguration:	The gates can be configured to swing 90 degrees in either direction; or configured to operate bi-directionally (180-degree swing)
Spacious Passage Width:	Provides a wide 36" passage width
Rugged Closure:	The gates have a rugged gravity closure mechanism that smoothly closes the gate – whether configured for a single direction, 90-degree, swing pattern, or a bi-directional, 180-degree, swing pattern
Configurable Swing:	Field-configurable to swing in a single direction or bi-directionally
Smooth Closure:	Reliable, gravity-assisted closure closes the gate smoothly

Available Models

- CSG
